

Contentra Technologies, a global leader in integrated content transformation solutions, is excited to announce the addition of **Nathan Edwards** as **Editorial Director—Science** to its team.

“We’re very pleased to have Nathan join our editorial group here at **Contentra Technologies**, and we can’t wait for Nathan to meet and work with our clients,” says Bill Faber, Contentra SVP of U.S. Operations.

Nathan brings a rich history of experience in educational publishing. He spent 10 years with McGraw-Hill Education, most recently as Senior Academic Designer K-5 STEM. Nathan led teams that produced award-winning science programs for elementary and middle school students at all ability levels. In addition he has successfully produced digital and mixed-media materials for science and math, as well as print. His recent focus has been on creating learning experiences that embrace the NGSS philosophy. Prior to joining McGraw-Hill, Nathan was in the classroom teaching middle school science, health, and language arts.

About Contentra Technologies

Contentra provides world-class content, knowledge, and technology solutions to clients globally. Contentra delivers full life-cycle content management services that include content creation, capture, digitization, preservation, and distribution to leading publishers, Fortune 500 companies, and government organizations like National Libraries—all from its ISO-certified facilities. Contentra has offices in the United States, Europe, and India. In the United States, its major educational clients include Houghton Mifflin Harcourt, McGraw-Hill Education, and Pearson, and its trade clients include Time-Life Books.
